OBJECTIVE

Data Science undergraduate with hands-on Machine Learning engineering experience building data pipelines, seeking to apply strong foundations in statistics, Python, SQL, and data visualization to real-world data challenges. Experienced in end-to-end data workflows — from cleaning, preprocessing and feature engineering to predictive modeling and dashboarding — with a track record of turning complex datasets into actionable business insights. Eager to bring domain expertise and analytical rigor to remote, cross-functional data science work.

EDUCATION

Bachelor of Science, Data Science (Honours) Techno India University, West Bengal	2024 – Present (Expected Graduation: 2028) Kolkata, West Bengal
Higher Secondary (WBCHSE) Secondary (WBBSE) Baghbazar Multipurpose Girls School (Govt. Spons.)	2024 2022 Kolkata, West Bengal

RELEVANT COURSEWORK

Data Analysis & Machine Learning, Exploratory Data Analysis (EDA), Data Mining, Feature Engineering, Classification, Clustering, Model Evaluation, Data Visualization

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, R, C/C++, JAVA
- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
- **Machine Learning:** Linear & Logistic Regression, Decision Trees, Random Forest, XGBoost, K-Means Clustering
- **Data Analytics & Visualization:** Excel, Power BI, Tableau
- **Databases:** MySQL, PostgreSQL
- **Cloud & Deployment:** Google Cloud
- **Version Control:** Git, GitHub

PROFESSIONAL EXPERIENCE

FlyRank AI Machine Learning Engineering Intern	(Remote) Jul 2026 – Present
• Complete weekly machine learning projects involving data preprocessing, feature engineering, model training, and evaluation. • Develop and evaluate end-to-end Machine Learning solutions using Python, SQL, Scikit-learn, Pandas, and Git for real business problem as part of a 20-week Machine Learning Engineering internship. • Collaborate on AI/ML workflows, experimentation through git and hugging face. • Document findings and present model performance through reports and visualizations. • Work with mentors in an Agile environment and deliver weekly assignments and project milestones	
JPMorganChase & Co. Quantitative Research Job Simulation	Virtual / Remote Jan, 2025
• Performed quantitative research tasks including data modelling and financial analysis in a simulated environment • Developed analytical solutions using Python and statistical techniques to solve complex business problems	
Deloitte Data Analytics Virtual Job Simulation	Virtual / Remote Aug, 2025
• Completed data analytics tasks including data cleaning, analysis, and reporting in a simulated consulting environment • Delivered insights and recommendations based on data analysis to support organizational decision-making	

PROJECTS

Insurance Claims Analytics (SQL) GitHub	June, 2026
- Developed SQL-based analytics solutions to analyze insurance claims, policy performance, and customer trends using complex joins, CTEs, window functions, and stored procedures. - Generated business insights through KPI reporting and interactive dashboards for risk assessment & decision-making.	
Regression & Time Series Analysis of Sales Data – YoY Sales Analysis & Prediction with ARIMA GitHub	June, 2026
Developed a sales forecasting solution using Regression Analysis, Time-series Decomposition and ARIMA to identify trends, seasonality and predict future performance on sales data containing 71,000+ transactions.	
AutoML Cash Flow Optimization for Insurance Companies GitHub	June, 2026
- Developed AutoML-based cashflow forecasting solution for insurance companies. Evaluated Linear Regressor, Random Forest and XGBoost models with XGBoost achieving the best predictive performance. - Built an optimization framework and interactive dashboard to improve liquidity management, financial planning, and investment allocation decisions.	
Global Superstore Sales Analysis & Forecast – Excel GitHub	May, 2026
- Built an end-to-end advanced Excel-based Sales Analytics Dashboard integrating data cleaning, KPI tracking, pivot tables, forecasting, regression analysis, and customer segmentation on 51,000+ records. - Performed statistical and predictive analysis to identify sales trends, profit drivers, customer segments, and forecast future revenue, enabling data-driven business decision-making.	
Customer Churn Analysis – Interactive Business Dashboard GitHub	Jan, 2026
- Created an interactive Power BI dashboard for analyzing customer churn drivers including KPIs and drill-downs - Cleaned & transformed raw data; built charts, filters, visualizations to highlight trends for data-driven decision-making	
Stock Market Exploratory Data Analysis – Python, yfinance GitHub	Nov, 2025
- Pulled real-time stock data using yfinance API and visualized price movements and market volatility - Detected market trends using rolling averages and statistical analysis; presented findings using Python visualizations	

CERTIFICATIONS

AI Fluency: Framework & Foundations , Anthropic	Jul, 2026
Intermediate Machine Learning , Kaggle	Jul, 2026
Basics of Data Analytics & Macros , UniAthena	Apr, 2026
Pandas , Kaggle	Apr, 2026
Intro to Machine Learning , Kaggle	Apr, 2026
Python , Kaggle	Mar, 2026
Oracle Cloud Infrastructure 2025 Certified Generative AI Professional , Oracle University	Nov, 2025
Getting Started in Google Analytics , Coursera	Nov, 2024
Introduction to Data Analysis using Microsoft Excel , Coursera	Sep, 2024

CORE COMPETENCIES

Data Analysis, Exploratory Data Analysis (EDA), Data Collecting, Data Handling, Data Cleaning & Manipulations, Feature Engineering, Statistical Modelling, Machine Learning, Predictive Analytics, Data Visualization, Python Programming, SQL Querying, R Programming, Data Analytics with Excel, Power BI Dashboarding, KPI Reporting

ADDITIONAL INFORMATION

Languages: English, French, Hindi, Bengali

Professional Skills: Analytical Thinking, Problem-Solving, Attention to Detail, Teamwork, Communication, Agile/Project Coordination, Fast Learner, Adaptable
